First you allow the Radio industry to open ownership to the super wealthy. Now just a few people control almost all of the airwaves. I am sick of it and that is why I bought a satellite radio. I am not interested in having my radio decide what I want to hear. I want a choice that is not available on local radio. Let the marketplace decide what should make it. Clearly any other decision would indicate that BIG money provided by the owners of Radio Monopolies have gotten to you.
